1. Rejection under 35 U.S.C. § 102(a)

Claims 1-17 were rejected under 35 U.S.C. § 102(a) as being anticipated by U.S. Patent Application Pub. No. 2002/0167961 to Haartsen (hereinafter "Haartsen").

Claims 1 through 17 have been cancelled without prejudice.

2. Allowable Subject Matter

Applicant notes with appreciation the allowance of Claims 18-25.

Applicant submits new Claims 26-33 drafted towards a wireless transceiver device, which recites, *inter alia*, "memory for storing synchronous and non-synchronous events; and circuitry defining logic that includes: building a fixed length user bit stream that reflects when synchronized events are to be transmitted; copying the fixed length user bit stream into a real time bit stream; determining what bit of the real time bit stream relates to a present time; and determining whether to initiate transmission of a non-synchronous communication event." (Claim 26). Applicant respectfully submits that new Claims 26-33 are allowable as written.

3. Conclusion

As a result of the foregoing, the Applicant Claims 18-25 and new Claims 26-33 are in condition for allowance, and respectfully requests an early allowance of such Claims. Applicant respectfully submits that no additional payment of fees is required for the new claims in that the new claims are not in excess of the number previously paid for. 37 CFR 1.16; MPEP 607 at p. 600-58 (August 2005, rev. 3).
